Art Unit: 3652

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/9/04 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3, 5-11, 13-15, 17-18, 30, and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hinchcliffe et al (US 4,303,366) in view of Lodi et al (US 4,575,301), both previously cited.

This rejection is set forth in prior Office action, paper no. 15, paragraph 3.

4. Claims 1 and 3-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schmermund (US 3,190,478, of record) in view of Lodi et al.

This rejection is set forth in prior Office action, paper no. 15, paragraph 4.

Art Unit: 3652

5. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hinchcliffe et al in view of Lodi et al, as applied to claims 13 or 14 above, and further in view of Hinchcliffe et al (US 3,985,252, of record).

This rejection is set forth in prior Office action, paper no. 15, paragraph 5.

6. Applicant's arguments filed 2/9/04 have been fully considered but they are not persuasive.

Applicant argues that neither Hinchcliffe nor Schmermund teach independent linear and rotational movement, and thus even when combined with the Lodi et al patent, do not result in the invention as claimed. Applicant asserts that the rotational and linear movements of the base references are linked since one movement must be completed before the other is started. While this may be true, it does not mean that the movements themselves are not independently controlled, as broadly claimed. Clearly, each reference shows means for separately (and thus independently) providing the linear and rotational movements. It seems as though applicant is actually arguing that to be independently controlled, the movement means must inherently be able to operate concurrently as well. But if this were the case, there would be no reason to claim both independently controlled and concurrently operated moving means. Therefore, it is not felt that the term "independently controlled" precludes sequential linear and rotational movements, as long as those movements are accomplished by separate means.

Art Unit: 3652

7. Claims 12, 28, and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 19-27 are allowed.

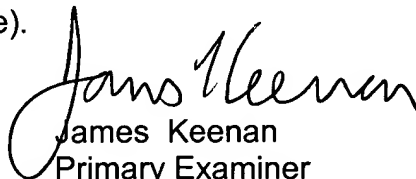

9. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP §706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
